Coimbatore, Tamil Nadu, India.

Professional Experience:

Senior Software Engineer | Episyche Technologies | September 2025 – Present

Client projects: Debitmydata.com

- **Full-Stack Development:** Designed and developed end-to-end modules across FastAPI, Django, and Next.js, delivering smooth authentication flows, SSO, advanced search/filtering, static content pipelines, and AI-driven features integrated with OpenAI Chat Completion.
- **Scalable Integrations & Automation:** Developed robust scalable Stripe subscription flows, optimized high-traffic backend APIs, and automated several data workflows to reduce operational overhead.
- **Cloud Deployment & Infra Management:** Deployed the platform on AWS EC2 with PM2 (frontend) and Gunicorn (backend), configured S3 for secure asset storage, and ensured high uptime through performance tuning and efficient resource management.

Client projects: Cofetti.ai

- **Backend Development & AI Integration:** Implemented secure authentication, Django SSO, and AI-powered image and text generation using OpenAI (DALL·E 3 & ChatCompletion), along with robust CRUD modules backed by PostgreSQL.
- **Payments & User Credits System:** Built a reliable Stripe-driven credits and checkout system, enabling smooth transaction flows and precise credit consumption tracking.
- **Production Deployment & Reliability:** Deployed backend services on AWS EC2 using Gunicorn and S3 storage while establishing monitoring practices that improved service stability and responsiveness

Software Engineer | Episyche Technologies | January 2024 – September 2025

Client projects: elevenflo.com

- **Frontend Development:** Developed frontend features using Next.js and Tailwind, including authentication modules, advanced search functionality, and multiple static pages, ensuring a clean, responsive, and user-friendly interface**.**

Client projects: bandbooker.com

- **Frontend Development:** Built the full Next.js frontend with complete Google SSO authentication, implemented static pages, and developed a real-time WebSocket-based live chat messaging system for seamless user communication.

Associate Software Engineer | Episyche Technologies | January 2022 – December 2024

Client project: whizco

- **Django Backend & Authentication:** Developed backend features using Django, implementing robust authentication, role-based access, CRUD APIs, and a full **Google SSO integration** to streamline login and account management.

In house project: webopt.ai

- **Frontend Development:** Integrated analytics data into the UI, built fully responsive pages using Next.js and Tailwind CSS, and implemented database-driven filtering features to deliver fast, dynamic, and user-centric workflows

- **Chrome Extension Development:** Built a fully responsive Chrome extension with automated page analysis, real-time console and network performance tracking, and seamless integration with WebOpt.ai APIs to enable in-browser diagnostics, error detection, and streamlined debugging workflows.

Technical Skills:

Frontend: React.js, Next.js, Tailwind CSS,
Backend: Python, Django, Fast API, and Bash scripting.
Database: SQL, PostgreSQL.
DevOps & Cloud: AWS (EC2, S3), Linux (Debian).

Leadership Experience:

At Episyche Technologies, led and mentored a team of junior developers by providing hands-on training in Next.js, React.js, Python, and Django, enabling them to gain real project experience and significantly improve overall code quality.

Education:

Bachelor of engineering | 2016 – 2020.
Pollachi institute of engineering and technology, Pollachi, Tamil Nadu, India.
